

Information About sbcosmo.com

by Jim Stubchaer 5/16/2011, rev 5/59/2014, 3/8/2015, 6/5/2017

General Description

The Cosmopolitan Club of Santa Barbara website is: www.sbcosmo.com

The Home Page is:

<http://www.sbcosmo.com/index.htm>

The site includes the Home Page with links to the current version of Crackers and the Crackers Archive, Special Events, Computer Society, and S.A.G.E. pages.

The Crackers Archive page includes links to previous editions of Crackers, which are stored in a folder at the website.

Most of the site is coded in standard HTML (hypertext markup language) and does not use advanced languages such as CSS, PHP, SQL, Java, Visual Basic, etc, except for the Java buttons at the top of the Home Page.

Hosting and Domain Name

The website host is GoDaddy.com. The domain name, sbcosmo.com, is registered at GoDaddy. The domain name expires on 9/19/2018. The hosting is paid to 9/18/2016 and will automatically renew and be charged to my VISA card unless another person becomes Webmaster.

The account number and user name for managing the GoDaddy account is **23498043**. The user name for posting files to and from the website is **sbcosmo**

The password for both is **(hidden)**

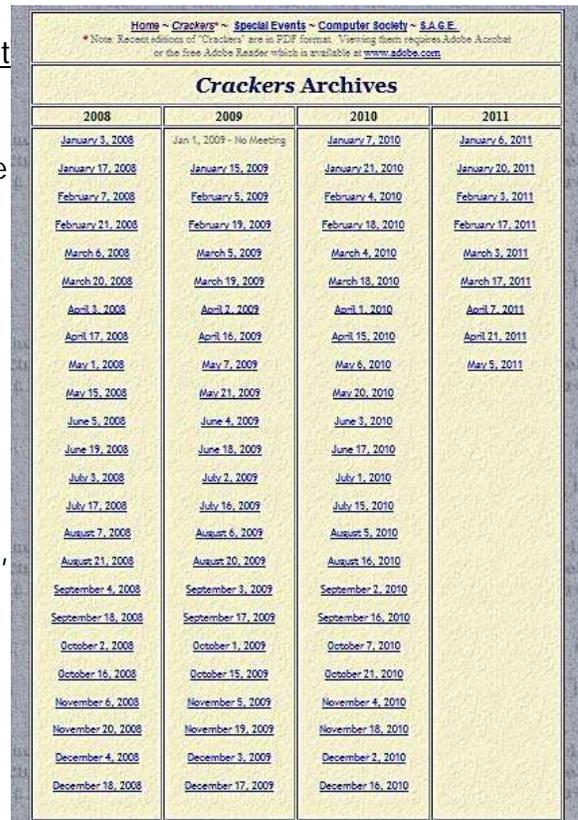

The disk space available for the Club account is 10 GB, of which about 100 MB is currently used.

For complete details on [website administration](#) and [file transfer](#) please see the attachments.

Website Design

The source code is HTML. The original layout used frames, but was converted to a table format in 2007. The width of the table, which is the active part of a page, is specified as 800 pixels on most pages. The *Crackers Archives* page table has been widened to make room for additional columns as the years go by. Page backgrounds outside the tables are a tiled background image, which is a grey pattern with muted text. The tables are centered on the pages. Rows and columns may be added or deleted. Different types of table borders may be specified. Text may be entered into cells of a table as well as before or after a table. The text can be formatted, including position, font type, font size, font color, etc.

Objects may be inserted and positioned in a table. Objects may be hyperlinks, images, web components, interactive button, date, time, etc.

The screenshot shows a web page titled "Crackers Archives" with a navigation bar at the top containing links for "Home ~ Crackers ~ Special Events ~ Computer Society ~ S.A.G.E." and a note about PDF editions. The main content is a table with four columns representing the years 2008, 2009, 2010, and 2011. Each cell in the table contains a date, with some cells for 2009 containing "No Meeting".

2008	2009	2010	2011
January 3, 2008	Jan 1, 2009 - No Meeting	January 7, 2010	January 6, 2011
January 17, 2008	January 15, 2009	January 21, 2010	January 20, 2011
February 7, 2008	February 5, 2009	February 4, 2010	February 3, 2011
February 21, 2008	February 19, 2009	February 18, 2010	February 17, 2011
March 6, 2008	March 5, 2009	March 4, 2010	March 3, 2011
March 20, 2008	March 19, 2009	March 18, 2010	March 17, 2011
April 3, 2008	April 2, 2009	April 1, 2010	April 7, 2011
April 17, 2008	April 16, 2009	April 15, 2010	April 21, 2011
May 1, 2008	May 7, 2009	May 6, 2010	May 5, 2011
May 15, 2008	May 21, 2009	May 20, 2010	
June 5, 2008	June 4, 2009	June 3, 2010	
June 19, 2008	June 18, 2009	June 17, 2010	
July 3, 2008	July 2, 2009	July 1, 2010	
July 17, 2008	July 16, 2009	July 15, 2010	
August 7, 2008	August 6, 2009	August 5, 2010	
August 21, 2008	August 20, 2009	August 16, 2010	
September 4, 2008	September 3, 2009	September 2, 2010	
September 18, 2008	September 17, 2009	September 16, 2010	
October 2, 2008	October 1, 2009	October 7, 2010	
October 16, 2008	October 15, 2009	October 21, 2010	
November 6, 2008	November 5, 2009	November 4, 2010	
November 20, 2008	November 19, 2009	November 18, 2010	
December 4, 2008	December 3, 2009	December 2, 2010	
December 18, 2008	December 17, 2009	December 16, 2010	

Website File Location, Folder and Subfolders (same on PC and Host Server)

sbcosmo: htm files for the main pages, the current Crackers, and faveicon.ico

- ├─ **Crackers Archive:** old editions of Crackers
- ├─ **CosmoCal:** monthly html calendars from 4/2007 to 12/2015
- ├─ Images: backgrounds used in calendars
- └─ **Graphics:** images, backgrounds, photos, etc, used in the website

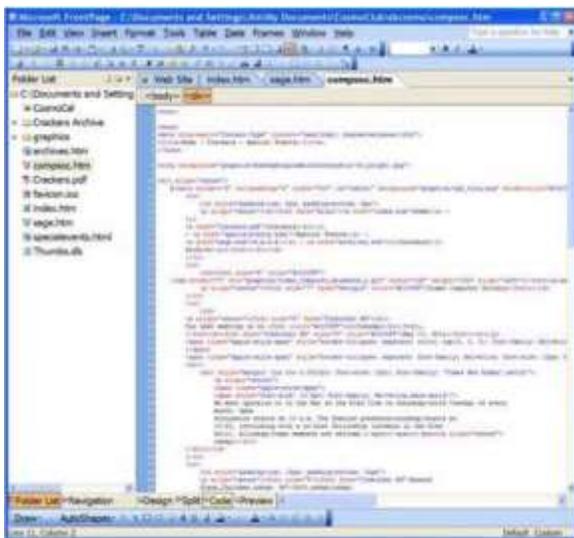

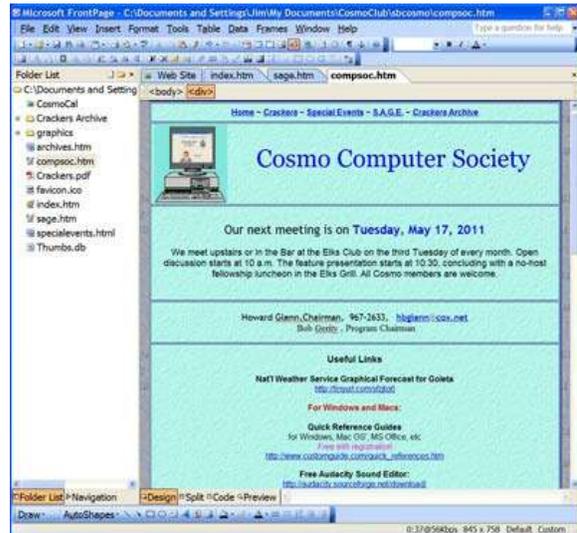

Website Maintenance

Either Ron White or I update the site twice monthly by posting the new Crackers to the website home page (index.htm) using FTP (file transfer protocol) in File Explorer to replace the previous version. could also be used.

We also add the new Crackers to the archive folder and make the necessary changes to the various pages. Annually we post the photo of the new Club president on the Home Page.

Website Editing

I used Microsoft FrontPage for editing the website until May, 2014. FrontPage is a WYSIWYG (what you see is what you get) program. Microsoft discontinued FrontPage several years ago, and replaced it with Expression Web 4, which I now use. It is available as a free download from Microsoft. The user can edit on a web page (right) without viewing the underlying HTML code. He can also edit the HTML code (below left), or in a combination view (below right).

These illustrations are from FrontPage but Expression Web is similar.

A sample of HTML code for a web page is on the [last page](#). It is "Pretty printed", that is formatted and indented to better show the various components of the code.

In HTML, the tags `<table>` & `</table>` begin and end a table, `<p ...>` begins a paragraph and `</p>` ends it. Other tags are similar, such as `<tr>` & `</tr>` for a row, `<td>` & `</td>` for a cell in a table, etc.

Several excellent HTML references are available on the web, including:

<http://www.w3schools.com/tags/default.asp>

<http://www.quackit.com/html/tags/>

Website Administration Details for sbcosmo.com

The sbcosmo.com website is located at godaddy.com. James Stubchaer is the account owner for both hosting and domain name registration. The web hosting was paid for two years from 9/18/2016 with my VISA card. The Club reimburses the costs.

The domain name "sbcosmo.com" is registered at godaddy.com. It was paid with my VISA card for five years from 9/18/2016.

=====

We have two user names but only one password at godaddy.com.

=====

The first user name is to access and manage our godaddy account (not for loading web pages into our web site).

<http://www.godaddy.com>

The user name is the account number: 23498043

=====

The second user name is to transfer files to and from our web site. ("ftp" means File Transfer Protocol)

<ftp://sbcosmo.com>

=====

The user name is: sbcosmo

=====

The password is (hidden) for both. Case sensitive.

=====

Using File Transfer Protocol is described on the next page.

How to use FTP with File Explorer in Windows 10

Open **File Explorer** on a Windows 10 computer

Click on **This PC** in the left navigation panel in **File Explorer**

Then click the **Computer Tab** at the top of the page

On the ribbon menu, choose **Add a network location**

This opens the **Add Network Location Wizard**

Click "Next", "Next", then type "<ftp://ftp.sbcosmo.com>" in the box, "Next", check "Log on anonymously", "Next", type <ftp.sbcosmo.com> as name, "Next". A dialog box should open asking for a user name and a password. The user name here is "sbcosmo".

=====

Transferring Files

Once your FTP location has been created, you can find it in **File Explorer** under "**This PC**".

Clicking it should open the remote location in the same way as Windows opens folders. You can copy and paste or drag files from local folders to the remote folder and back again in the familiar manner.

Moving Files Around on the Server

You cannot move files or folders from one place to another within the remote folders at the web site directly. This is a limitation of the FTP protocol.

You can delete or copy files on the web site. Files can be dragged to a local folder on your PC and vice versa.

Editing Files on the Server

You cannot edit files at the web site; however, you can copy a file back to a local folder on your PC, edit it there, and then copy it back to the remote folder at the web site.

=====

Sample HTML Code (for the S.A.G.E. Web Page)

```
<html xmlns="http://www.w3.org/1999/xhtml">
<head>
  <meta name="generator" content="HTML Tidy for Linux/x86 (vers 25 March 2009), see www.w3.org"
/>
  <meta http-equiv="Content-Type" content="text/html; charset=us-ascii" />
