LAST MEETING

October 1, 2015

Lynda Tanner

CEO, Visiting Nurse and Hospice Care

Dr. Harry Brown introduced Ms. Tanner and summarized her background which includes a bachelor’s degree in nursing and a master’s degree in nursing administration from the University of Idaho. She has more than 30 years of experience working in homecare, including working as a consultant and a surveyor for the Joint Commission on Accreditation of Healthcare Organizations and as Chief Clinical Executive at Sutter VNA and Hospice. She became CEO of Santa Barbara Visiting Nurses and Hospice Care (VNHC) in January, 2010. In addition to this position, she is active in many professional, service and community organizations.

Ms. Tanner began her presentation by asking for a show of hands of those who have family members or close friends who received either visiting nurse or hospice care. A large response showed the importance of these compassionate services to our members. She told of the founding of visiting nurses in 1907 which steadily grew to where 13,500 persons received care from this non-profit organization in 2014. A major service of VNHC is home health care. Ms. Tanner explained that this service covers a variety of

recovery situations and chronic diseases where the patient is home bound. Current findings, she stated, show that under these conditions, “home is the best place to be.” This service requires a doctor’s orders and makes skilled nursing services available around the clock.

Hospice care serves people with life-limiting illnesses where life prognosis is less than six months. The emphasis here is comfort and preserving the quality of life that remains. Skilled nursing, counseling and therapy services are provided and are available at home or in care facilities

VNHC recently opened the new Serenity House, a comfortable and attractive living facility for end of life situations which cannot be met at home. Located in a serene hillside area, it provides comfort, relief of pain and symptoms and provides emotional and spiritual support to patients. Ms. Tanner invited members to visit this facility (individually, not as a group).

Another service that VNHC personnel provide is palliative care for patients with life-threatening illness. This care may be provided in a home or in a hospital or similar facility and includes pain and symptom management and emotional, social and spiritual support.

Other services include a loan closet where medical equipment can be borrowed on a short term basis, and remote facilities at Solvang and Lompoc.

Ms. Tanner’s comprehensive presentation went smoothly in spite of recurring glitches in the AV system.
